Profile

A Bachelor of Science in Information Technology graduate from Central Bicol State University of Agriculture Sipocot Campus CBSUA batch 2019. I have almost 5 years of experience in a manufacturing company, working as a production controller that focuses on handling operators and employees in the production area. Also, we handle company product data to create reports like product forecasts and product operations. My strength is in digital art like logo design and graphic design. I have knowledge in web development, but as of now, due to lack of experience in actual work in web development, I like to focus on the front end.

Skills

- Computer literacy
- Creativity
- Technical support
